Behave your prints

Project activities

- To date, partners in this project have held a Kick-off meeting in the BYP project in Belgrade, Serbia,
- Slovenian partner Smart Idea developed a methodology for gathering good practices and identifying stories that represent misbehaviour when using digital prints.
- The methodology's development and analysis of current practices have the singular goal of defining methods for gathering existing information about the digital footprint we leave as digital citizens.
- Data will be collected in the following areas by project partners:
- Desk research on current training and educational programs for this subject.
- Focus groups of experts –
- Identity thefts, cyberbullying prevention, plagiarizing content, hacking, scamming examples, phishing, and negative social media comments
