

BEHAVE YOUR PRINTS BYP

STUDENTS MOBILITY

"We are thrilled to announce the success of the "BYP Behave your prints" project in Tirana, Albania, under the Erasmus+ Capacity Building Sector.

The project aimed to test the BYP methodology on 24 young people, who will participate in mobility and further transfer the acquired knowledge to 120 of their peers from 6 partner countries.

DIGITAL PRINTS

The BYP methodology is a unique approach that emphasizes personal development and environmental responsibility. The methodology encourages young people to reflect on their behavior and its impact on the environment. It also promotes the adoption of sustainable behaviors and lifestyles that contribute to environmental protection.

METODOLOGY

During the mobility, the 24 young people underwent training and coaching sessions, which equipped them with skills and knowledge to effectively transfer the BYP methodology to their peers.

The sessions were facilitated by experts in the field of sustainability, and the participants had the opportunity to engage in interactive learning activities.

ULTIMATE GOAL

The project's ultimate goal is to disseminate the acquired knowledge to a minimum of 120 young people through peer-to-peer training sessions. By transferring their learning to their peers, the participants aim to raise the self-confidence of the young people and promote environmental sustainability.

We are confident that the BYP methodology will have a lasting impact on the lives of the young people who participated in the mobility. We also hope the project's results will be disseminated widely to inspire more young people to adopt sustainable behaviours and promote environmental protection.

We thank the Erasmus+ Capacity Building Sector and all the partners who made this project successful. We look forward to sharing more updates on our progress as we promote sustainable development in our communities. Sincerely, The BYP Behave your prints Team.
